

## CUMULATIVE INDEX: VOLUME 11

## SUBJECT INDEX

Abdominal circumference, 144-148  
 Abdominal pregnancy, 350-352  
 Abortion, spontaneous, 386-397  
 Acetylcholinesterase band, 149-152  
 Acid-base balance, 9-13, 71  
 Adrenal gland, fetal hemorrhage, 302-304  
 Adrenergic blockade, neonatal, 91-93  
 Age  
   endometritis, 24-26  
   gestational, and risk of death, 267-272  
   small for gestation, 344-347  
 Agensis  
   of diaphragm, 340-343  
   renal, 184-186  
 Alpha-fetoprotein, 149-152  
   chorioangioma and, 245-248  
   during pregnancy and in neonate, 279-281  
   in prenatal diagnosis, 286-287  
 American Academy of Pediatrics, annual meeting, abstracts, 168-177  
 Amino acids, excitatory, 169  
 Amniotic fluid, acetylcholinesterase band, 149-152  
 Amniotic fluid index, predictor of latency after premature rupture of membranes, 249-252  
 Anemia, 9-13, 71  
 Antibiotic treatment, 40-41  
 Antiphospholipid syndrome, 1-3  
 Aplastic cutis congenita, 149-152  
 Asphyxia  
   and infant mortality, 290-294  
   risk of, 377-381  
 Atresia  
   esophageal, 123-128  
   pyloric, 286-287  
 Bandl's ring, 65-66  
 Biopsy, prenatal, 160-162  
 Birthweight  
   carbon dioxide and, 237-241  
   low, 297-301  
   macrosomic, 51-56, 260-262  
   race and, low, 169-170  
   risk for cerebral palsy, low, 377-381  
   and risk of death, 267-272

Bleeding  
   gastrointestinal, and hemophilia B, 192-193  
   third trimester, effect on infant, 85-90, 167  
 Blood flow  
   fetal, 337-339  
   in superior mesenteric artery, 176  
   uterine, 313-316, 337-339  
 Blood pressure  
   insulin and, 369-373  
   steroids and, 171  
 Bradycardia, congenital, 353-355  
 Brain, temperature of, 137-143  
 Breach presentation, 348-349  
 Bronchial obstruction, for emphysema of infant, 433-435  
 Bronchopulmonary dysplasia, 172  
 Caffeine, cardiovascular effects of, 132-136  
 Calcification, of fetal myocardium, 179-183  
 Carbamoyl phosphate synthetase deficiency, 160-162  
 Carbon dioxide, transcutaneous levels in low birthweight infants, 237-241  
 Cardiac transplantation, pregnancy and, 217-219  
 Cardiovascular problems, effect of caffeine, 132-136  
 Catheterization  
   umbilical arterial, 94-99, 176  
   umbilical venous, 67-70  
 Cerebellum, transverse diameter, 144-148  
 Cerebral infarction, in neonates, 119-122  
 Cerebral palsy, risk factors for, 377-381  
 Cervical ripening  
   hemodynamic effects of, 337-339  
   prostaglandin E<sub>2</sub>, 309-312, 337-339, 436-439  
 Cesarean section  
   age and, 24-26  
   for fetal entrapment, 348-349  
   for failed vaginal birth, 65-66  
   preeclampsia and, 288-289  
   vaginal delivery after, 309-312  
 Chorioamnionitis, 205-207

Chorioangioma, maternal alpha-fetoprotein levels and, 245-248  
 Circulation, ovine uteroplacental, 172  
 Clinic staff, attitude toward patients, 362-366  
 Coagulation screening, of premature infants, 27-29  
 Cocaine use, 179-183, 340-343  
 Congenital diseases  
   absence of diaphragm, 340-343  
   bradycardia, 353-355  
   goiter, 21-23  
   heart, 334-336  
   hernia, 176-177  
   hyperinsulinism, 113-115  
   malformations, 123-128  
 Corticosteroids, 163-166, 226-230, 423-426  
   in premature infants, 171  
 Corticotropin test, 175  
 Cysticercosis, during pregnancy, 409-411  
 Cysts, placental, 14-18  
 Death  
   fetal, 267-272  
   *See also* Mortality  
 Developmental outcome, prediction of, 85-90, 167  
 Dexamethasone, effect on pulmonary hypoplasia, in rats, 226-230  
 Diabetes  
   erythropoietin levels and, 427-429  
   insulin-induced hypoglycemia, 231-236  
   insulin and blood pressure, 369-373  
   macrosomic fetus and, 51-56  
   maternal ketoacidosis, 430-432  
   nonobese mouse, 51-56  
 Diagnosis, prenatal, 160-162  
 Diaphragm, absence of, 340-343  
   herniation of, 176-177, 412-415  
 DNA, of placenta, 14-18  
 Dobutamine, for hypotension, 169  
 Dopamine, for hypotension, 169  
 Doppler flow pattern  
   of inferior vena cava, 255-259  
   *See also* Ultrasonography  
 Echocardiography, for fetal heart disease, 334-336

## CUMULATIVE INDEX: VOLUME 11

## SUBJECT INDEX

Abdominal circumference, 144-148  
 Abdominal pregnancy, 350-352  
 Abortion, spontaneous, 386-397  
 Acetylcholinesterase band, 149-152  
 Acid-base balance, 9-13, 71  
 Adrenal gland, fetal hemorrhage, 302-304  
 Adrenergic blockade, neonatal, 91-93  
 Age  
   endometritis, 24-26  
   gestational, and risk of death, 267-272  
   small for gestation, 344-347  
 Agensis  
   of diaphragm, 340-343  
   renal, 184-186  
 Alpha-fetoprotein, 149-152  
   chorioangioma and, 245-248  
   during pregnancy and in neonate, 279-281  
   in prenatal diagnosis, 286-287  
 American Academy of Pediatrics, annual meeting, abstracts, 168-177  
 Amino acids, excitatory, 169  
 Amniotic fluid, acetylcholinesterase band, 149-152  
 Amniotic fluid index, predictor of latency after premature rupture of membranes, 249-252  
 Anemia, 9-13, 71  
 Antibiotic treatment, 40-41  
 Antiphospholipid syndrome, 1-3  
 Aplastic cutis congenita, 149-152  
 Asphyxia  
   and infant mortality, 290-294  
   risk of, 377-381  
 Atresia  
   esophageal, 123-128  
   pyloric, 286-287  
 Bandl's ring, 65-66  
 Biopsy, prenatal, 160-162  
 Birthweight  
   carbon dioxide and, 237-241  
   low, 297-301  
   macrosomic, 51-56, 260-262  
   race and, low, 169-170  
   risk for cerebral palsy, low, 377-381  
   and risk of death, 267-272

Bleeding  
   gastrointestinal, and hemophilia B, 192-193  
   third trimester, effect on infant, 85-90, 167  
 Blood flow  
   fetal, 337-339  
   in superior mesenteric artery, 176  
   uterine, 313-316, 337-339  
 Blood pressure  
   insulin and, 369-373  
   steroids and, 171  
 Bradycardia, congenital, 353-355  
 Brain, temperature of, 137-143  
 Breach presentation, 348-349  
 Bronchial obstruction, for emphysema of infant, 433-435  
 Bronchopulmonary dysplasia, 172  
 Caffeine, cardiovascular effects of, 132-136  
 Calcification, of fetal myocardium, 179-183  
 Carbamoyl phosphate synthetase deficiency, 160-162  
 Carbon dioxide, transcutaneous levels in low birthweight infants, 237-241  
 Cardiac transplantation, pregnancy and, 217-219  
 Cardiovascular problems, effect of caffeine, 132-136  
 Catheterization  
   umbilical arterial, 94-99, 176  
   umbilical venous, 67-70  
 Cerebellum, transverse diameter, 144-148  
 Cerebral infarction, in neonates, 119-122  
 Cerebral palsy, risk factors for, 377-381  
 Cervical ripening  
   hemodynamic effects of, 337-339  
   prostaglandin E<sub>2</sub>, 309-312, 337-339, 436-439  
 Cesarean section  
   age and, 24-26  
   for fetal entrapment, 348-349  
   for failed vaginal birth, 65-66  
   preeclampsia and, 288-289  
   vaginal delivery after, 309-312  
 Chorioamnionitis, 205-207

Chorioangioma, maternal alpha-fetoprotein levels and, 245-248  
 Circulation, ovine uteroplacental, 172  
 Clinic staff, attitude toward patients, 362-366  
 Coagulation screening, of premature infants, 27-29  
 Cocaine use, 179-183, 340-343  
 Congenital diseases  
   absence of diaphragm, 340-343  
   bradycardia, 353-355  
   goiter, 21-23  
   heart, 334-336  
   hernia, 176-177  
   hyperinsulinism, 113-115  
   malformations, 123-128  
 Corticosteroids, 163-166, 226-230, 423-426  
   in premature infants, 171  
 Corticotropin test, 175  
 Cysticercosis, during pregnancy, 409-411  
 Cysts, placental, 14-18  
 Death  
   fetal, 267-272  
   *See also* Mortality  
 Developmental outcome, prediction of, 85-90, 167  
 Dexamethasone, effect on pulmonary hypoplasia, in rats, 226-230  
 Diabetes  
   erythropoietin levels and, 427-429  
   insulin-induced hypoglycemia, 231-236  
   insulin and blood pressure, 369-373  
   macrosomic fetus and, 51-56  
   maternal ketoacidosis, 430-432  
   nonobese mouse, 51-56  
 Diagnosis, prenatal, 160-162  
 Diaphragm, absence of, 340-343  
   herniation of, 176-177, 412-415  
 DNA, of placenta, 14-18  
 Dobutamine, for hypotension, 169  
 Dopamine, for hypotension, 169  
 Doppler flow pattern  
   of inferior vena cava, 255-259  
   *See also* Ultrasonography  
 Echocardiography, for fetal heart disease, 334-336

- Eclampsia, postpartum, 288-289  
 Electroconvulsive therapy, during pregnancy, 116-118  
 Emphysema, of infant, 433-435  
 Endometritis, age and, 24-26  
 Enterocolitis, necrotizing, 30-32  
 Entrapment of fetus, 348-349  
 Epidermolysis bullosa, 286-287  
 Erythrocytes, nucleated, and congenital hyperinsulinism, 113-115  
 Erythropoietin serum levels during labor, 427-429  
*Escherichia coli*, 205-207  
 Esophagus, atresia of, 123-128  
 Exercise, fetal response to maternal, 263-266  
 Exomphalos, 14-18  
 Extracorporeal membrane oxygenation hernia and, 176-177  
     for respiratory failure, 174  
 Eye splash, risk in obstetrics, 359-361
- Feeding  
     enteral, 176  
     formula, 173  
 Femur length, 144-148  
 Fentanyl, 173  
 Fern test, 46-50  
 Fetus  
     cardiac effects of tocolysis, 109-112  
     cardiac response to testing, 73-79  
     distress, 194-198, 302-304, 430-432  
     effect of electroconvulsive therapy on, 116-118  
     effect of labetalol on, 91-93  
     effect of magnesium sulfate on, 401-403  
     effect of maternal exercise on, 263-266  
     entrapment of, 348-349  
     heart rate and distress, 194-198  
     hemorrhage, 253-254, 302-304  
     intracranial teratoma, 420-422  
     liver length, 344-347  
     motor response to testing, 73-79  
     nalbuphine effect on, 367-368  
     nonimmune hydrops, 253-254, 317-319, 439-440  
     risk of prednisone on, 423-426  
 Foramen ovale, premature closure, 439-440  
 Formula feeding, and growth, 171-172  
 Fracture, clavicle of neonate, 331-333  
 Fructosamine, maternal, 4-8
- Gastrointestinal bleeding, 192-193  
 Genetic disorders  
     mosaicism 45,X/46,XY, 184-186  
     neonatal mortality from, 100-103  
     trisomy 9, 80-81  
     trisomy 21, 19-20  
 Gentamicin, for pyelonephritis, 40-41  
 Gestational dating, 404-408  
 Glucose-6-phosphate dehydrogenase deficiency, 174  
 Goiter, congenital, 21-23  
 Growth  
     formula feeding and, 171-172  
     model of fetal organs, 320-325  
     retardation, 144-148  
     small for gestational age, 344-347
- Habituation testing, 73-79  
*Haemophilus influenzae* type b, 170-171  
 Head circumference, 144-148
- Heart  
     congenital disease, 334-336  
     fetal rate, and fetal distress, 194-198  
     fetal rate response to vibroacoustic stimulation, 273-278  
     twin fetal rates, 208-212  
 Hemoglobin  
     concentration, 9-13  
     glycosylated, 260-262  
 Hemoglobinopathy, sickle cell disease and, 187-191  
 Hemophilia B, gastrointestinal bleeding and, 192-193  
 Hemorrhage  
     fetal adrenal gland, 302-304  
     fetal intracranial, 253-254  
 Hernia, diaphragmatic, 104-108, 129-131, 176-177, 340-343, 412-415  
 Human immunodeficiency virus, transmission of, 326-330  
 Hydrocephalus, 253-254  
 Hydrops, nonimmune, 253-254, 317-319, 439-440  
 Hygroma, cystic, 19-20  
 Hyperbilirubinemia  
     glucose-6-phosphate dehydrogenase deficiency, 174  
     skin color and, 223-225  
 Hyperglycemia  
     maternal, 51-56  
     in newborn, 4-8  
 Hyperinsulinism  
     congenital, 113-115  
     hypoglycemia and, 374-376  
 Hypertension  
     neonatal, 302-304  
     in pregnancy, 313-316  
 Hypoglycemia  
     amino acids release, 169  
     hyperinsulinism and, 374-376  
     insulin-induced, 231-236  
 Hypoplasia  
     pulmonary, of fetus, 104-108  
     of rat 226-230  
 Hypotension, drugs for, 169  
 Hypothyroidism, of newborn, 30-32  
 Hysterectomy, eclampsia and, 288-289
- Immunoglobulin preparations, 170  
 Indomethacin  
     intrauterine treatment with, 295-296  
     for patent ductus arteriosus, 220-222
- Infants  
     anion gap in mechanical ventilation, 213-216  
     coagulation screening, 27-29  
     effect of sound on sick, 173-174  
     emphysema, 433-435  
     hypotension in, 169  
     low birthweight, 85-90, 167  
     response to *Haemophilus* vaccine, 170-171  
     risk of thrombocytopenia, 423-426  
     sepsis in, 176  
     transcutaneous carbon dioxide and low birthweight, 237-241  
     See also Neonates
- Infections  
     antibiotic treatment of, 40-41  
     cysticercosis during pregnancy, 409-411  
     parvovirus B19, 398-400  
     in rabbits, 173  
     response of neonate to, 282-285  
     risks in obstetrics, 359-361
- Insulin  
     and blood pressure, 369-373  
     hyperinsulinism, 374-376  
     hypoglycemia, 231-236  
 Interleukins, in neonate, 176, 282-285  
 Intestine, perforation of small, 295-296  
 Intracranial hemorrhage, of fetus, 253-254  
 Ischemia, upper limb, 119-122  
 Isoimmunization, maternal, 374-376
- Ketoacidosis, maternal, 430-432  
 Kidney, nonfunctioning in neonate, 302-303
- Labetalol, effect on fetus, 91-93  
 Labor  
     erythropoietin levels, preterm, 427-429  
     induction with prostaglandin E<sub>2</sub>, 309-312, 337-339, 436-438  
     preterm, 297-298  
 Leiomyoma, uterine, 356-358  
 Leukocytes, and natural surfactant, 33-36  
 Limb ischemia, upper, 119-122  
 Liver, fetal length, 344-347  
 Lung model, 177
- Macrosomia  
     cause of, 51-56  
     fetal and birthweight, 260-262  
     prediction of, 144-148  
 Magnesium sulfate  
     effect on fetus, 401-403  
     in preeclampsia, 153-156  
 Malformations, congenital, 123-128  
 Membranes, ruptured, 46-50  
 Metabolism, inborn error of, 160-162  
 Miscarriage, recurrent, 386-397  
 Möbius sequence, 157-159  
 Modeling, of fetal organ growth, 320-325  
 Monitoring, fetus with bradycardia, 353-355  
 Morbidity, of fetus from third trimester bleeding, 85-90, 167  
 Mortality  
     of fetus from parvovirus B19, 398-400  
     genetic disorders and, 100-103  
     of infant, 290-294  
 Mosaicism, 45,X/46,XY, 184-185  
 Mouse, nonobese diabetes, 51-56  
 Myocardium  
     fetal calcification, 179-183  
     infarction, postpartum, 1-3
- Nalbuphine, effect on fetus, 367-368  
 Neonates  
     alpha-fetoprotein in, 279-281  
     brain temperature of, 137-143  
     cerebral infarction, 119-122  
     clavicle fracture, 331-333  
     genetic disorders, 100-103  
     hemophilia B, 192-193  
     hyperinsulinism and hypoglycemia, 374-376  
     hypertension, 302-304  
     hypothyroidism, 30-32  
     interleukins, 176, 282-285  
     interventions by pediatricians, 175  
     low birthweight, 163-166  
     nonfunctioning kidney, 302-304  
     pulmonary blood flow after surfactant, 382-385

- response to infection, 282-285  
steroids, 177

steroids and blood pressure, 171
- Prenatal clinic, staff attitude toward patients, 362-366
- Prostaglandin E<sub>2</sub>, 309-312, 337-339, 436-438
- Pulmonary blood flow, in neonate, 382-385
- Pyelonephritis, gentamicin for, 40-41
- Pylorus, atresia of, 286-287
- Race, and risk of death, 267-272
- Rat  
injury from nitric oxide, 168-169  
nitric oxide synthase inhibition in, 168
- Renal failure, in twin gestation, 242-244
- Renal hypoplasia and agenesis, 184-186
- Respiratory distress syndrome  
complications of, 433-435  
fentanyl for, 173  
neonatal, 382-385  
surfactant and, 174  
ventilation for, 174-175
- Risk factors, maternal, for HIV infection, 326-330
- Ritodrine, effect on fetus, 109-112
- Rossavik growth model, 320-325
- Rupture of membranes, premature  
amniotic fluid index, 249-252  
labor induction after, 436-438  
latency and, 416-419
- Sacculation of uterus, 350-352
- Scalp smear, fetal, 42-45
- Screening  
coagulation, 27-29  
importance of, 174  
for toxoplasmosis, 57-62
- Seizures during pregnancy, 409-411
- Sepsis  
in infants, 176  
maternal caused by *Escherichia coli*, 205-207
- Sickle cell disease, 187-191
- Skin color, and hyperbilirubinemia, 223-225
- Sound, effect on sick preterm infant, 173-174
- Steroids  
antenatal, 171  
inhaled, 177  
*See also* Corticosteroids
- Stimulation, vibroacoustic, response to, 273-278, 401-403
- Streptococcus*, tests for, 177
- Stress, thermal, 313-316
- Superior mesenteric artery, 176
- Surfactant, 174  
effect on leukocytes, 33-36  
effect on pulmonary blood flow, 382-385
- Tachycardia, fetal, 367-368
- Temperature, of brain, 137-143
- Teratoma, fetal intracranial, 420-422
- Tests  
corticotropin, 175  
fetal response to, 73-79  
urine antigen, 177
- Thrombocytopenia, 374-376  
risk in infants, 423-426
- Thyroid gland, 21-23
- Thyroxine treatment, 30-32
- Tocolysis  
effect on fetus, 109-112  
with indomethacin, 295-296
- Toxoplasmosis, congenital, prevention of, 57-62
- Transfusion, twin-twin, 317-319
- Transplantation, pregnancy after, 217-219
- Trauma, neonatal clavicle fracture, 331-333
- Triiodothyronine, effect on pulmonary hypoplasia in rats, 226-230
- Trisomy 9, ultrasound findings, 80-84
- Trisomy 21, 19-20
- Tumor necrosis factor, in neonate, 282-285
- Twins  
behavior in utero, 208-212  
effect of electroconvulsive therapy on, 116-118  
maternal obstructive renal failure, 242-244  
predicting discordancy, 199-204  
twin-twin transfusion, 317-319
- Ultrasonography  
diagnostic, 297-301  
Doppler, 21-23, 255-259, 337-339  
growth parameters for predicting discordancy, 199-204  
for Möbius sequence, 157-159  
for pulmonary hypoplasia of fetus, 104-108  
for intracranial teratoma, 420-422  
for trisomy 9, 80-81  
uterine sacculation vs abdominal pregnancy, 350-352
- Umbilical artery, catheterization of, 94-99, 176
- Umbilical vein  
catheterization of, 67-70  
pressure in inferior vena cava, 155-159
- Ureaplasma urealyticum*, 173
- Urethral valves, in successive generations, 37-39
- Urine antigen tests, 177
- Uterus  
blood flow in, 313-316  
leiomyomas of, 356-358  
sacculation of, 350-352
- Vaccine, for *Haemophilus influenzae*, 170
- Vaginal birth, failed, 65-66
- Vena cava  
inferior, of fetus, 255-259  
syndrome, 129-131
- Ventilation  
anion gap in mechanical, of newborn, 213-216  
oscillatory, for emphysema, 433-435  
in respiratory failure, 174-175
- Ventricle, cardiac, growth model of, 320-325
- Vibroacoustic stimulation, 273-278, 401-403
- Women, nonpregnant, insulin-induced hypoglycemia and, 231-236
- Zavanelli maneuver, 348-349
